

Dear home owner,

To comply with regulatory requirements, the City of Jefferson is offering an incentive program for conserving water. Devices included in this program are water saving dish washers, clothes washers and 1.28 gallons per flush toilets. Dishwashers need to be in the 4 to 6 gallons per load range and clothes washers need to be in the 10 to 18 gallons per load range. Some devices may not apply. To be clear, this program is for the retrofitting or replacement of old inefficient devices, not new home installs or replacement of newer devices that are already efficient and have failed. Participants must be Owner-Occupants. Owners are responsible for showing proof of purchase and proof of what is being replaced.

Upon approval of the Public Works Director, a \$50.00 credit (per household) will be applied to your next water bill.

Jeff Buskirk
Public Works Director
